

[Request for proposal]

Creating a portal site for rowing information aggregation

Japan Rowing Association (JARA)

business purpose

The objectives and expected results of this project are as follows.

the purpose

Build a PF that manages all activities of everyone involved in Rowing with a unified ID, and maximize the value that all stakeholders can get from Rowing throughout their lives.

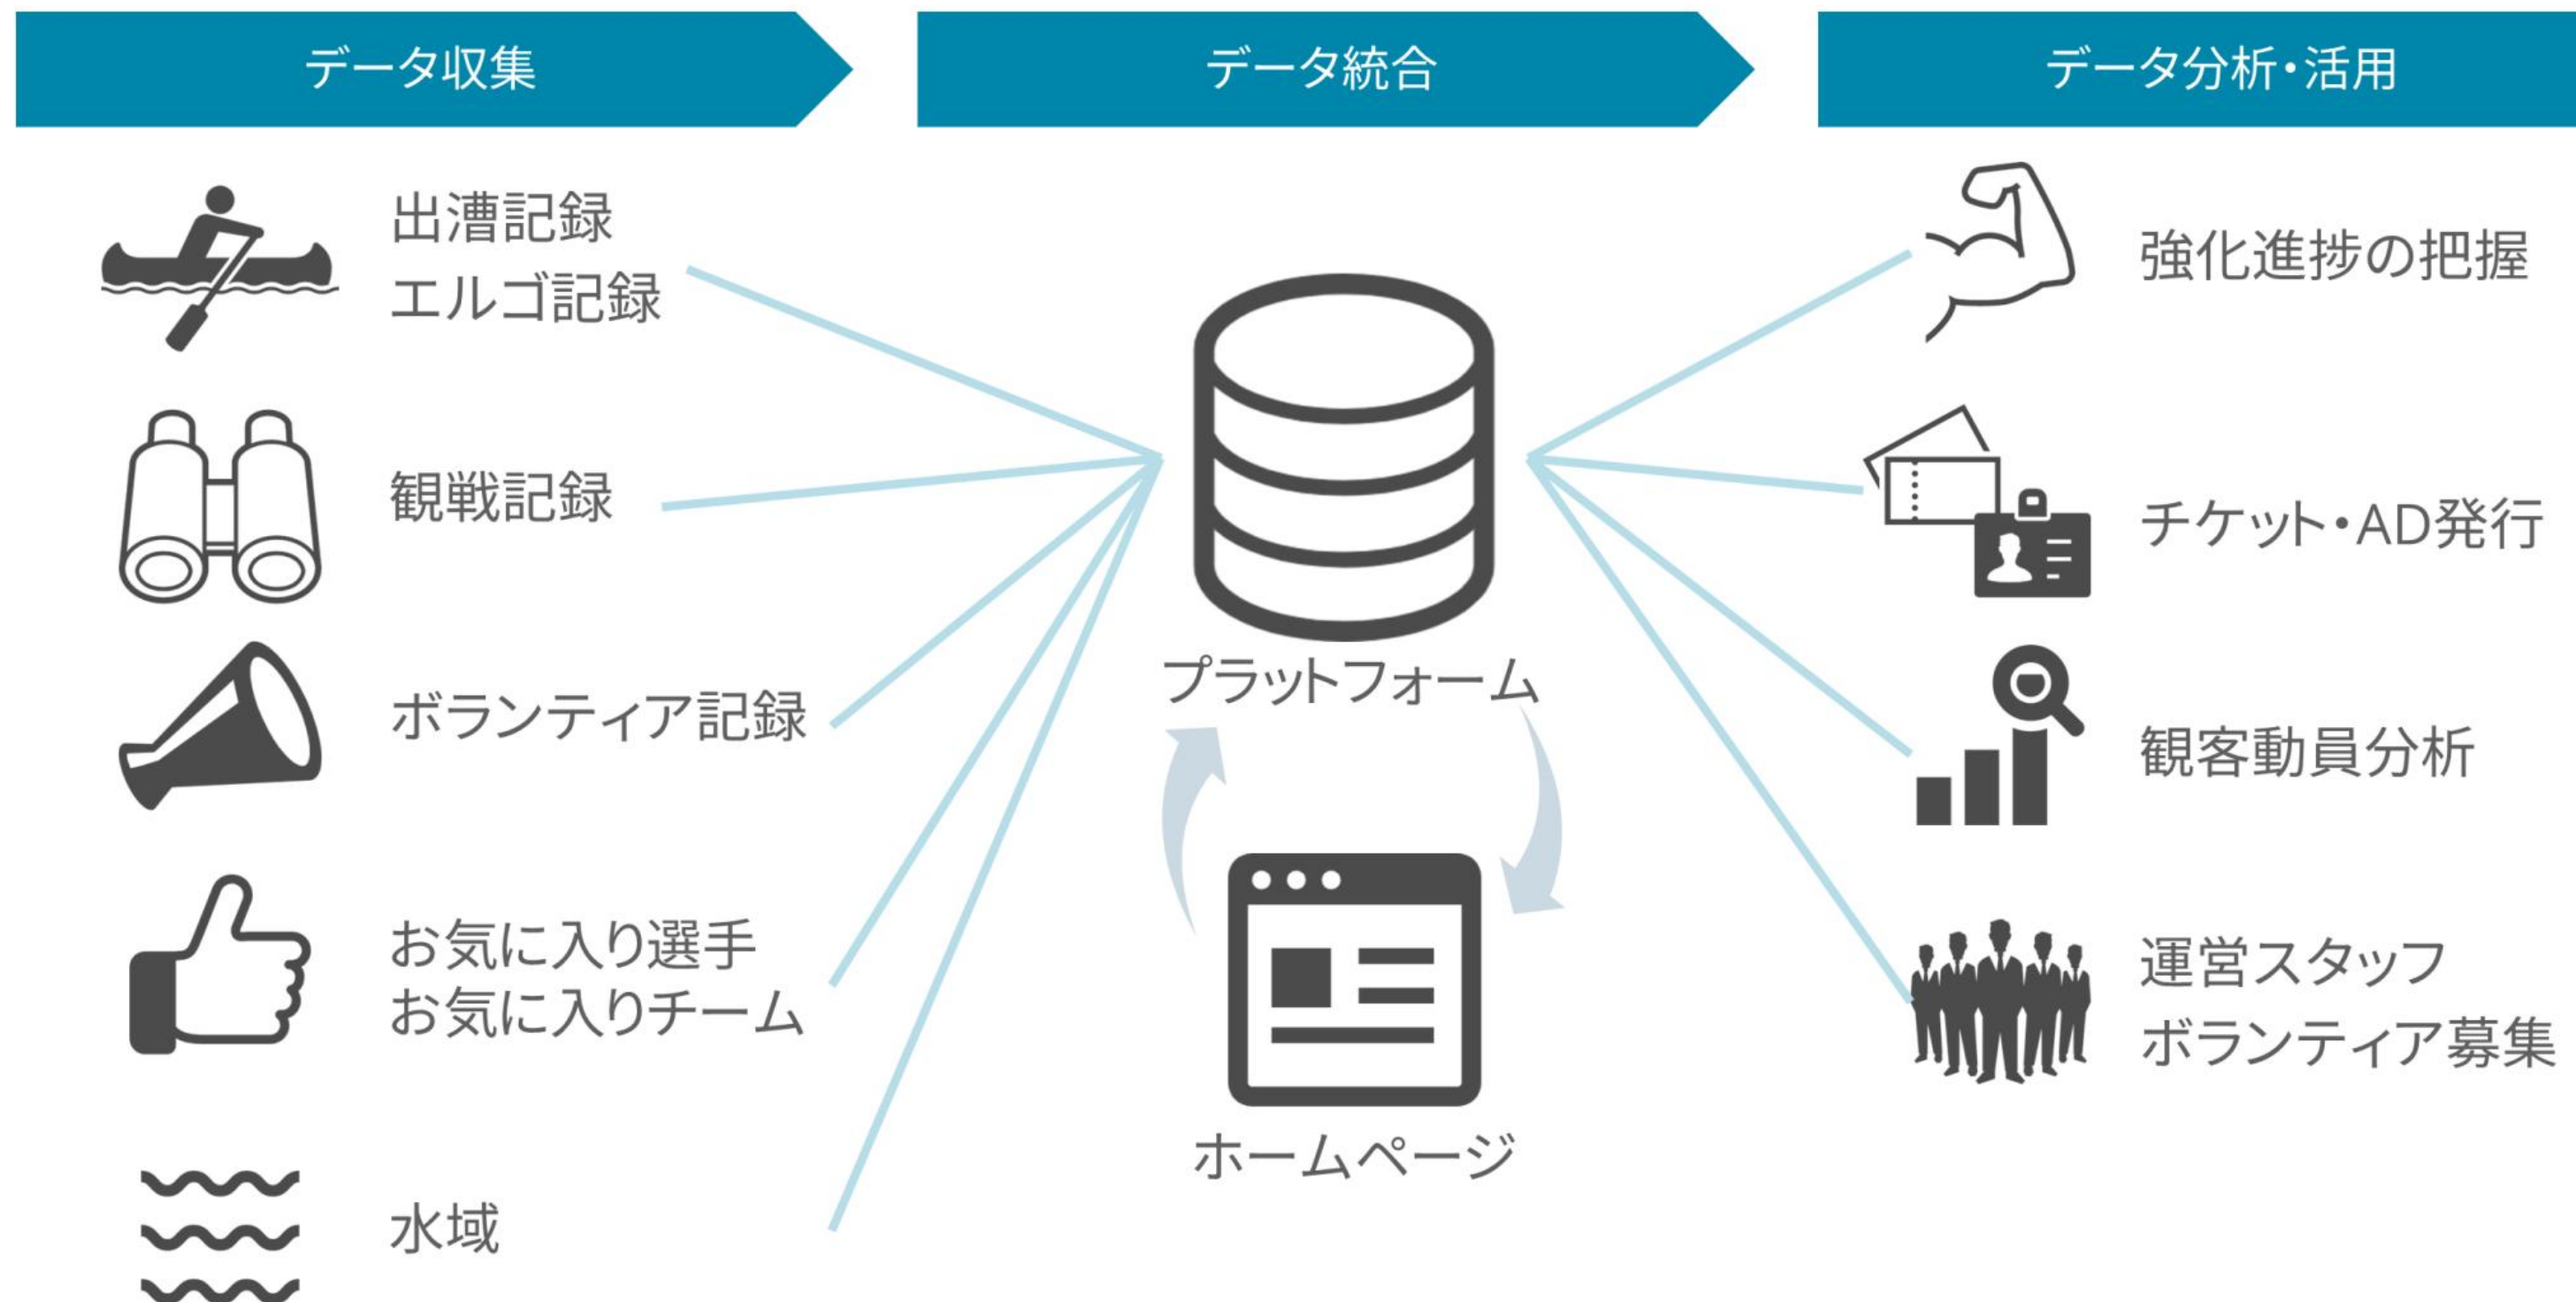

Expected results

- (1) By realizing a trace of activities such as participating in and watching a game, we will improve the level of competition, loyalty, and management stages for each type of involvement, as well as the circulation of human resources and the competition category of “doing” ÿ “watching” ÿ “supporting”. create a synergistic effect beyond
- (2) Promote the popularization of competitions by creating a database of competition records and providing additional functions such as entry and AD issuance. Contribute to promotion and operational efficiency.

Business content

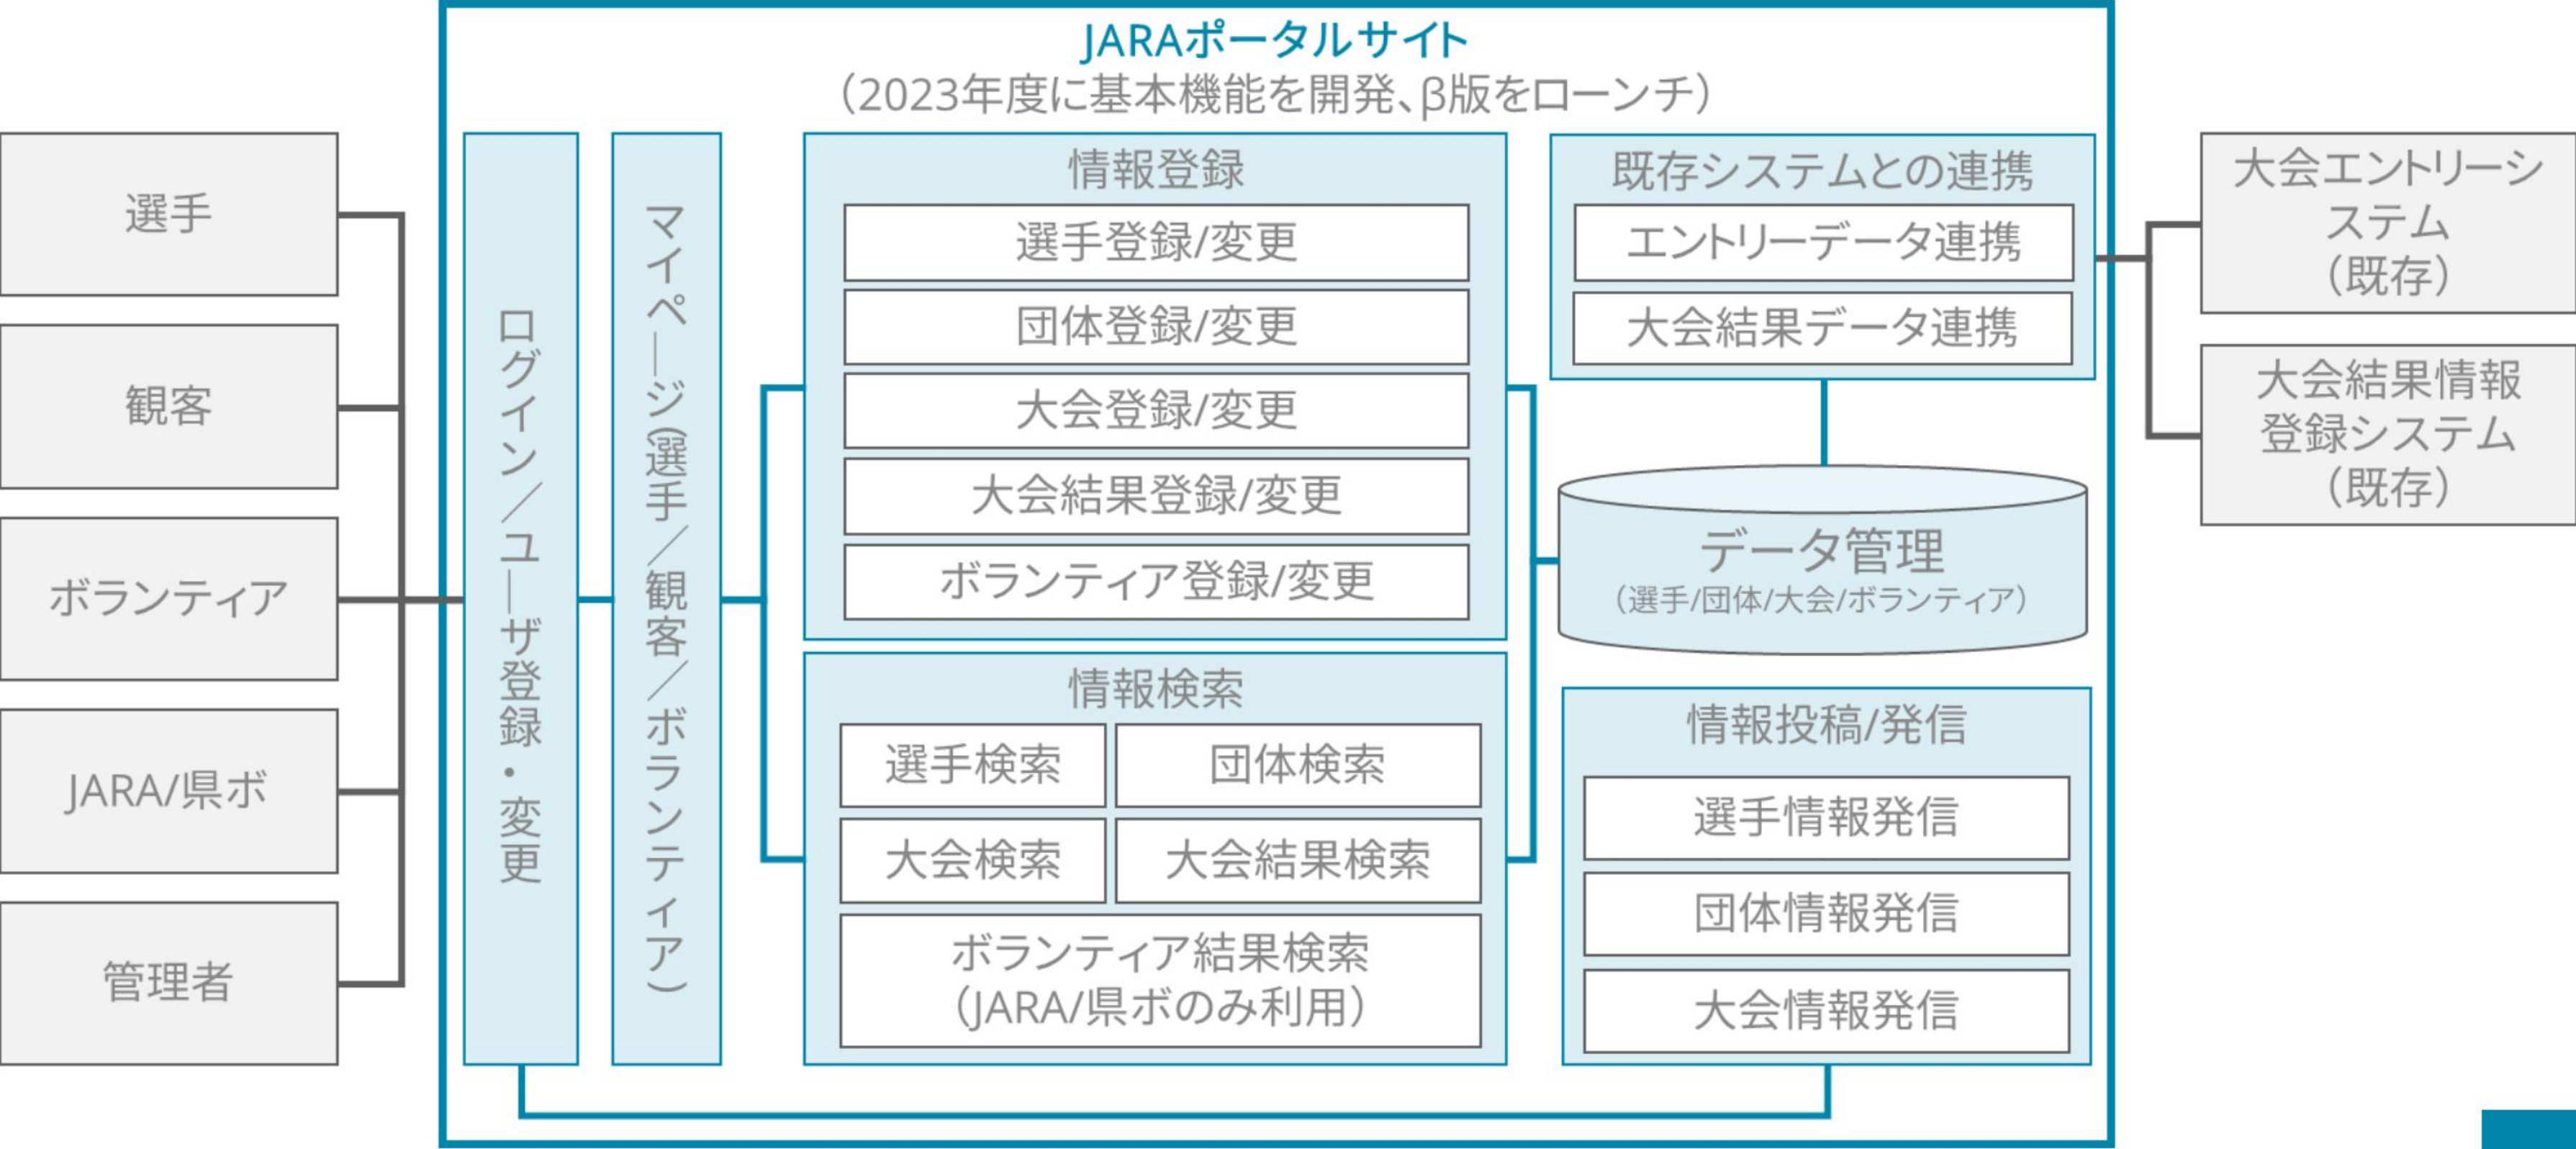

Create a portal site for information sharing among athletes, spectators and volunteers.

* Image of utilization (see the next page for the scope of this fiscal year)
